

Conformity declaration with regard to *EU-Directive EG-2011/65/EU(RoHS2), Modification 215/863/EU "Directive for the restriction of the use of certain hazardous substances in electrical and electronic equipment" and EU-Directive 2000/53/EU (ELV) on end-of life vehicles"*

Based on our current state of knowledge, the products we supply are RoHS-compliant.

We point out that our products may contain lead as an alloying element.

Its concentration is:

- for steel below the maximum permissible limit of 0.35% by weight under the exemption of Annex 3 of the RoHS Directive for steel used for machining purposes (6a).
- for aluminium below the maximum permissible limit of 0.40% by weight according to the exemption of Annex 3 of the RoHS Directive for aluminium (6b).
- for copper alloys below the maximum permissible limit of 4% by weight according to the exemption of Annex 3 of the RoHS Directive for copper alloys (6c).

For any further questions do not hesitate to contact us.
